Year 2 Term 2 Computing

Key Question: What makes a good digital photograph?

Vocabulary

Landscape photo	**Landscape orientation is when the camera is held horizontally**  .
Portrait photo	**Portrait orientation is when the camera is held vertically** 

Key skills:

When taking a photograph remember these important features:

- **Positioning**: Make sure you think about holding the device so that the main subject of the photograph is in view.
- **Framing**: Make sure the main image that you are taking a photo of is within the frame of the device.
- **Detail**: Make sure that you are close enough to see the detail in the main image you are taking a photo of.
- **Focus**: Make sure that the image is not blurry.
